

A1
Amended 4. (Amended) A system according to claim 1, characterized in that said wireless network and/or said hard-wired network (10; 50) is/are managed by a server (4).

A2 8. (Amended) A system according to claim 1, characterized in that peripheral devices (17) are connected to said network (10; 50), through a hard-wired connection (16; 53), by means of network boards (15) for transmission via cable.

A3 9. (Amended) A system according to claim 1, characterized in that peripheral devices (17) are connected to said hard-wired network (10, 50) through a radio link, by means of devices (12) for radio transmission.

10. (Amended) A system according to claim 4, characterized in that said server (4) has devices (32, 35) for connection to another local network (LAN) (30) or to a WAN external network (31).

A4 12. (Amended) A system according to claim 10, characterized in that said device (35) for connection of the server (4) to another outside network (WAN) (31) is an analogical or digital modem (35).

Cont. 13. (Amended) A system according to claim 10, characterized in that said device (35) for connection of the server (4) to another outside network (WAN) (31) is a router.

14. (Amended) A system according to claim 1, characterized in that said network (10) is an Ethernet local network (LAN) of the linear type.
